

# DO NOT REMOVE EYEPRO FOR ANY REASON WHATSOEVER!!!\*

**Your eye protection MUST remain on at ALL times while on the field. The only time you may remove eyepro is when you have left the field and are in the parking lot. Airsoft BBs WILL (and have!) taken out eyes.**

**This INCLUDES PAUSES IN BETWEEN GAMES, DOWN TIME, AND THE DEBRIEFING AFTER THE GAME. If you see someone removing their eyepro respectfully ask them to put it back on.**

**People often shoot their guns when they shouldn't, even after game is over. Someone might be clearing a gun or have a negligent discharge. Airsoft BBs are not like real bullets and WILL ricochet erratically.**

**If your goggles are fogging up please realize you're not alone, this happens to literally everyone at one point or another. If you're struggling with fog ask someone to lend you some antifog. Likewise if you see someone fogging up please offer them antifog if you have it. Apply the antifog WITHOUT removing your goggles and try to retain as much protection as you can while doing so. If you really need help please ask a moderator or Omego for assistance.**

**\*Parents, you MUST make sure your children FULLY understand this rule. If your child loses an eye it is YOUR fault. If your child is not disciplined enough to follow this rule they should not be playing Airsoft!!!**
